OBJECTIVE & SUMMARY

Seeking a challenging software development opportunity in a diverse environment where innovation and education are valued and encouraged.

Software Engineer with experience in Android Application and Android system stack, including system service developing, UI animation, a Simulation application, and auxiliary tools.

TECHNICAL SKILLS

- **Program Language**: Python, Java, JavaScript, C++
- **Framework**:Android Stack & SDK, Node.js, MongoDB, Jade, Less.js
- **Software Engineering**: UML, Design Pattern, OOP
- **Machine Learning Framework**: Keras, Matplotlib
- **Math**: Statics
- **English**: TOEIC 840 pts.

EXPERIENCE

Senior Software Engineer	Mstar Semiconductor	Jan. 2016 - Sept. 2016
	Hsinchu, Taiwan	

- Android smart TV division.
- Smart TV system stack maintenance. (Binder, service)
- Implement image loader for product line. (Reactive programming)
- Auto translation program for multi-language string table (speed up routine task).
- Enhance terminal development.(increase Debugging efficiency)
- UML code injection.(runtime sequence diagram for debugging purpose)

iOS Development Engineer	Industrial Technology Research Institute	July 2013 - Sept. 2015
	Hsinchu, Taiwan	

- Develop client side App(iOS) of Smart Cold Chain Logistics System.
- Design a lightweight algorithm of detection about status of container on embedded platform.

Android Development Engineer	KerjaDulu	Nov. 2014 - July 2015
	Taipei, Taiwan	

- KerjaDulu Human Resource App: Project Starter,OOP Design, UI effect, SQLite

HONORS AND AWARDS

Qualcomm award in MobileHeros, *Book Finder*	2012
Excellent work in ICT Innovative Services, *Touch Projector*	2012

EDUCATION

Master of Computer Science, National Tsing Hua University, Taiwan.	Sept. 2015

PROJECT

- EcoSim: A Smartphone-Based Sensor-Node Simulator with Native Sensor and Protocol-Stack Emulation
- Gesture recognition with IoT platform based on triaxial acceleration   2015
- Voice Recognition and Correction
- use Machine Learning to hack CAPTCHA
